BIOMECCO

Caring for the Earth, the key to life

DEOTRASH

The idea that improves the quality of life

MADE IN ITALY

ORGANIC SANITIZING DEVICE

“DEOTRASH” is a device triggered by the bin lid. Each time the lid closes, the pump is activated and product is sprayed into the container. So each time a waste bag is thrown into the bin, it is sanitized and deodorised, preventing the diffusion of harmful bacteria and eliminating unpleasant odours.

This organic product consists of mineral salts, harmless microorganisms, biodegradable surfactants and fragrances.

DEOTRASH - 250ml

For 120 l to 3,200 l MSW bins

Mounting by a **clip**,
usable also
with a bag!!!

*Easy, Fast,
no screws!!!*

DEOTRASH solution

The organic product consists of mineral salts, harmless microorganisms, biodegradable surfactants and fragrances. Tests have shown that use of the product with the patented DEOTRASH device drastically reduces pathogenic agents normally found in waste (Escherichia coli, intestinal Enterococci, pathogenic Staphylococci, mould, yeast, etc.).

QUICK EASY INSTALLATION

Mount inside the bin, fill the container with the liquid and use. Each time the lid is closed the spray is activated.

EASY MAINTENANCE

The container can be refilled by a single person in a few simple steps. A bottle lasts between 30 and 90 days depending on the frequency of use.

ENVIRONMENTAL FRIENDLY

The BIO12 is a non-toxic, environmentally friendly biodegradable product.

Patented system for the complete removal of odours and bacteria

DEOTRASH - 100ml

for 5 l to 50 l waste bins

DEOTRASH 100ml is the household version of the product. It fits easily into all household waste bins.

BENEFITS OF USING DEOTRASH

EASY INSTALLATION
The waste bin solution is ready to use at any time the lid is activated.

MENTALLY FRIENDLY
The solution is harmless, non-toxic and 100% biodegradable.

VERSATILE
The device can be mounted in any waste container, from the largest down to the smallest household sized bin. The spray nozzle can be oriented in three different directions according to individual requirements.

LOW COST
Reducing unpleasant odours means that bins need to be emptied and washed less frequently. This is particularly important in outlying areas where - without Deotrash - half empty bins must be collected due to the unpleasant smell.
= 30% cost savings

Elimination of odours and sanitisation of waste bins.

Cloud Water

Fixed Location

Mobile Location

Patented machine for hand washing and drying
with a **WATER SAVING OF 95%**

WATER IS A PRECIUS THING... DON'T WASTE IT!!

COMPANY PROFILE

Our mission is to improve the quality of life, producing innovative products with an high sense of respecting for the environment. With a team made by dynamic persons with an high experience, Biomeco can be located in the Ecology Environmental Businnes Area. Many the collaborations with the companies of this field, who has made various test and note that these products are efficiency to improve the quality of our life.
